Construction is under way at Terra Grain Fuels' 150-million-litre-a-year ethanol plant at Belle Plaine, Saskatchewan.

A 150-million litre ethanol plant is sited for Belle Plaine, Saskatchewan, Canada. Site preparation began in September, with project completion scheduled in the fourth quarter of 2007.

During construction, the project will create 150 construction jobs and 40 permanent, full-time jobs when in production. "There's been a lot of site work done," said Gary Drummond, founder and major shareholder of Terra Grain Fuels, referring to the 40-acre site north of the Saskferco fertilizer plant.

The plant will consume 15 million bushels (or 410,000 tonnes) of wheat per year, which represents about three per cent of total production, but one-third of production in a 100-km area around the plant.

Delta-T Corp. of Williamsburg, Va. is the technology design and equipment procurement contractor, while EllisDon Corp. of Toronto and VCM Contractors & Engineers of Saskatoon are joint venturing on the engineering, procurement and construction contract.

During construction, the project will create 150 construction jobs and 40 permanent, full-time jobs when in production.

Headquartered in Williamsburg, VA, Delta-T is a design-build firm that provides technology, plants, systems, and services to the fuel, beverage, industrial, and pharmaceutical alcohol markets. Delta-T has provided alcohol production, dehydration, and purification solutions to more than 110 clients worldwide on five continents.
