

Press Release

November 25, 2006

Producers attending Canadian Western Agribition contract record number of Bushels

Terra Grain Fuels President and CEO, Tim La France, announced the success of the “Grow With Us” program launch at the 2006 Canadian Western Agribition.

“The response was unbelievable” stated La France who went on to say “ we thought we had it right as does everybody when they launch a program but we really and truly didn’t know. We listened to each and every producer we met at Focus Groups, Ag Boards, Town Hall meetings and around kitchen tables and from that developed what we believed was one of the most innovative programs for producers. It was most definitely the first of its kind in Canada’s ethanol community. We thought we would be safe and launch our program at traditionally a livestock show. We thought if we were wrong we could change it before a show like “Crop Production” in January. We obviously did something right as there were times at the show when we couldn’t write contracts fast enough and the line ups got so bad we had to take names and numbers and call people back. We are very excited with the success and looking forward to the Crop Production Show in Saskatoon in January and our Town Hall meeting tour beginning at the end of January. Please check our web site for local times and locations”

Higher yields
Cash Advance Program
No interest
2 year contracts available
Scheduled deliveries
'Act of God' clause

Lower risk
Cash today, Crop Tomorrow
No payment 'til delivery
Liberal Spec
Deal direct
No application fee”
